

Being Socially Responsible

Our Companies Commitment

To Our Planet

Keeping in mind any actions taken by any of our companies has an impact on our plant now and into the future. We will actively work in such a manner as to minimize in any way the negative impact to our Plant by the actions we take. We will also engage in any possible way practices and events that will further positively impact our Plant. We will strive to change our thinking and where ever possible contribute.

To Our Communities

Merely existing in our communities is not acceptable. We will where ever and whenever possible be good stewards of our communities. We will champion a cause that plagues our communities and give back in any way possible and create Jobs and actively participate with members and other business within our communities.

To Our Guest

Recognizing that our guest is an integral part of our success we must be socially responsible. Considering their needs and views on being responsible; engage them where ever there is a cause that they may become involved in, promote where we stand as a company, always be open minded and to find common ground where there are differing views. We will support those with special needs and make it a priority to treat everyone equally.

To Our Staff

Knowing that they too are part of the community we will support and foster relationships as they will carry out this mantra into their communities and support them as they champion causes near and dear to them. We will embrace diversity and value feedback from our staff to better our equality and promote a successful working environment.

This is our Commitment!
